ScheduleMeeting (Pseudocode)

```
ScheduleMeeting(event *e)
{
  if event = NULL
     then, Initialise InitEvent
  print ScheduleMeeting

 * Input Time in Hours(In which 0 to 23)
    and Time in Minutes(In which 0 to 59)

 * Enter (Meeting Id, Organiser Employee Id, Meeting description, Meeting Data,
Meeting Duration, Meeting Status, Meeting Location, Number of participants)

 * These all data will stored in participants.txt

 * print event Successfully Added.

 Return e;

}

*initEvent()
{
 * Allocating memory for event pointer 'e' dynamically.

 * Initialise all variable as NULL or 0
    Hours = 0;
    Minutes = 0;

 * copy NULL string in variable description.

 Return e;

}
```
